

JAY KIM

FULL STACK WEB DEVELOPER

ABOUT

Full stack web developer leveraging a background in cognitive psychology and experience in research, leadership, cross-discipline collaboration. Earned a certificate in full stack web development from the University of California, Irvine after working on multiple projects using Javascript, CSS, and HTML. Most recently built a login system using authentication and password-hashing for a MERN stack web application as a tool to avoid crowds during the COVID-19 pandemic. While comfortable working on both the front and back-end, I am dedicated to creating a simple but beautiful user experience on every project.
